INDEPENDENT AUDITORS' REPORT

TO THE SHAREHOLDERS OF ALQ GOLD CORP.

We have audited the accompanying financial statements of ALQ Gold Corp., which comprise the statements of financial position as at February 28, 2015 and 2014 and the statements of loss and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility
Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the financial statements present fairly, in all material respects, the financial position of ALQ Gold Corp. as at February 28, 2015 and 2014, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter
Without qualifying our opinion, we draw attention to note 1 in the financial statements, which describes matters and conditions that indicate the existence of material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern.

Supplemental cash flow information - Note 13

1. Nature of Operations and Going Concern

ALQ Gold Corp. (the "Company") was incorporated under the laws of British Columbia, Canada, on February 25, 1985. The Company is primarily engaged in the acquisition, exploration and development of mineral properties located in Canada.

The Company's corporate office and principal place of business is 410 Donald Street, Coquitlam, British Columbia, Canada V3K 3Z8.

The business of exploring for minerals involves a high degree of risk and there can be no assurance that any of the Company's current or future exploration programs will result in profitable mining operations. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete their exploration and development, and establish future profitable operations, or realize proceeds from their sale. The carrying value of the Company's mineral properties does not reflect present or future value.

These financial statements were prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at February 28, 2015, the Company had working capital of $26,902 (2014 - $171,936). Accounts payable to directors and officers as at February 28, 2015 is $76,196. The directors and officers are making efforts to make funds available for operations. Therefore, effective working capital available as of February 28, 2015 is $103,098. As the Company chooses to proceed on additional exploration and development programs at the Lustdust property and other properties it may acquire, it will need to raise additional funds for those expenditures. These circumstances comprise material uncertainties that cast substantial doubt as to the ability of the Company to meet its obligations as they fall due, and accordingly, the ability of the Company to continue as a going concern.

The Company has relied mainly upon the issuance of share capital to finance its activities. Future capital requirements will depend on many factors including the Company's ability to execute its business plan. The Company will be required to issue share capital to finance its future activities through private placements and the exercise of options and warrants, and is actively seeking additional equity financing. There can be no assurance that such financing will be available to the Company. Inability to secure future financing would have a material adverse effect on the Company's business, results of operations and financial condition.

These financial statements do not include the adjustments to assets and liabilities that would be necessary should the Company be unable to continue as a going concern.

2. Basis of Preparation

These financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"), on a historical cost basis using the accrual basis of accounting, except for cash flow information and financial instruments measured at fair value. The financial statements were approved and authorized for issue by the Board of Directors on June 29, 2015. The Company's functional and presentation currency is the Canadian dollar.

3. Summary of Significant Accounting Policies

(a) Significant Accounting Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires management to make estimates and judgments that affect amounts reported in the financial statements. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances, and subject to measurement uncertainty. The effect on the financial statements of changes in such estimates in future reporting periods could be significant.

Estimates and areas where judgment is applied that have significant effect on the amount recognized in the financial statements include:

Impairment of long-lived assets

The carrying value of mineral property acquisition and exploration costs is reviewed each reporting period to determine whether there is any indication of impairment. The estimation of the impairment involves the application of a number of significant judgments and estimates to certain variables including metal price trends, plans for properties, and the results of exploration and evaluation to date.

The determination of, and provision for, reclamation and remediation obligations

The Company assesses its provision for asset retirement obligations at each reporting date or when new material information becomes available. Accounting for reclamation and remediation obligations requires management to make estimates of the future costs the Company will incur to complete the reclamation and remediation work required to comply with existing laws and regulations. Actual costs incurred may differ from those amounts estimated. Also, future changes to environmental laws and regulations could increase the extent of reclamation and remediation work required to be performed by the Company. Increases in future costs could materially impact the amounts charged to operations for reclamation and remediation.

Deferred taxes

The Company recognizes a deferred tax asset to the extent recovery is probable. Assessing the recoverability of deferred tax assets requires management to make significant estimates of future taxable income against which deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilized. In addition, changes in tax laws could limit the ability of the Company to obtain tax deductions in future periods.

3. Summary of Significant Accounting Policies, continued

(a) Significant Accounting Estimates and Judgments, continued

Share-based payments

Share-based payments are determined using the Black-Scholes option pricing model based on estimated fair values of all share-based awards at the date of grant and are expensed to profit or loss over each award's vesting period. The Black-Scholes option pricing model utilizes subjective assumptions such as expected price volatility and expected life of the option. Changes in these input assumptions can significantly affect the fair value estimate.

(b) Cash and Cash Equivalents

Cash and cash equivalents consists of cash on hand, term deposits and investments with maturities of three months or less from the date of purchase that are readily convertible to known amounts of cash and subject to an insignificant risk of change in value.

(c) Mineral Properties

All expenditures related to the acquisition, exploration and evaluation of mineral properties are capitalized on a property-by-property basis, net of recoveries, until these mineral properties are placed into commercial production, sold or abandoned. If commercial production is achieved from a mineral property, the related mineral properties are tested for impairment and reclassified to mineral property in production. If a mineral property is sold or abandoned, the related capitalized costs will be expensed to profit or loss in that period.

From time to time, the Company may acquire or dispose of all or part of its mineral property interests under the terms of property option agreements. Options are exercisable entirely at the discretion of the optionee, and accordingly, option payments are recognized when paid or received. If recoveries are received and exceed the capitalized expenditures, the excess is reflected in profit or loss.

All capitalized mineral property costs are reviewed at each reporting date, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, joint venture expenditure commitments or the Company's assessment of its ability to sell the property for an amount exceeding the carrying value, provision is made for the impairment in value. The amounts capitalized for mineral properties represent costs incurred to date less write-downs, and are not intended to reflect present or future values.

The Company recognizes an estimate of the liability associated with statutory, contractual, constructive or legal obligations associated with site closure and property retirement costs in the period in which the liability is incurred if a reasonable estimate of fair value can be made. The estimated fair value or present value of future cash flows is capitalized to the related mining assets with a corresponding increase in the rehabilitation provision in the period incurred. The capitalized amount will be depreciated on a unit-of-production basis over the estimated life of the ore reserve.

3. Summary of Significant Accounting Policies, continued

(c) Mineral Properties, continued

The amount of the provision will be increased each reporting period due to the passage of time and the amount of accretion is charged to profit or loss. The provision can also increase or decrease due to changes in regulatory requirements, discount rates, and assumptions regarding the amount and timing of future rehabilitation expenditures. Any changes are recorded directly to the related mining assets with a corresponding change to the rehabilitation provision. Actual rehabilitation expenditures incurred are charged against the rehabilitation provision to the extent of the liability recorded.

(d) Reclamation Bond

Reclamation bond is recorded at amortized cost and held by Canadian government agencies, in trust or a cashable term deposit.

(e) Share Capital

Equity units

Proceeds from the issue of units, consisting of common shares and share purchase warrants, are first allocated to common shares based on the quoted market value of the common shares at the time the units are priced, and the balance, if any, is allocated to the attached warrants. Share issue costs are netted against share proceeds.

Flow-through shares

Flow-through shares entitle a company that incurs certain resource expenditures in Canada to renounce them for tax purposes allowing the expenditures to be deducted for income tax purposes by the investors who purchased the shares.

Any difference between the amount recognized in common shares and proceeds received is deemed equal to an estimated premium investors pay for the flow-through feature and is initially recorded as a liability.

The amount recorded as a liability relating to the sale of tax benefits is reversed when the tax benefits are renounced. The difference between the amount originally recorded as a liability and the estimated income tax benefits on the date of renouncement is recognized in profit or loss. The tax effect of the renunciation is recorded at the time the Company makes the renunciation, which may differ from the effective date of renunciation.

3. Summary of Significant Accounting Policies, continued

(f) Non-monetary Consideration

Shares issued for non-monetary consideration are recorded at fair value based on the quoted market value of the Company's shares on the date of share issuance. Shares to be issued, which are contingent upon future events or actions, are recorded by the Company when it is reasonably determinable that the shares will be issued.

(g) Share-based Payments

Share-based payments for employees are measured at the fair value of the instruments issued and amortized over the vesting period. Share-based payments for non-employees are measured at either the fair value of the goods or services received or the fair value of the equity instrument issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded on the date the goods or services are received. The fair value of the options is charged to profit or loss using the graded vesting method, with the offset credit to share-based payments reserve.

Consideration received on the exercise of stock options is recorded as share capital and the related fair value calculated is transferred from share-based payment reserve to share capital.

(h) Income Taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax basis. Deferred tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

The effect on deferred tax assets and liabilities of a change in tax rates is recognized in profit or loss in the period that includes the enactment date. Deferred tax assets also result from unused losses carried forward, resource related pools and other deductions. A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable income will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

3. Summary of Significant Accounting Policies, continued

(i) Loss per Share

Basic loss per share is computed by dividing the net loss available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted loss per share is computed similar to basic loss per share, except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to repurchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options, warrants and similar instruments that would be anti-dilutive.

(j) Financial Instruments

The Company classifies its financial assets in the following categories: at fair value through profit or loss ("FVTPL"), available-for-sale ("AFS") or loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at recognition.

Fair value through profit or loss

FVTPL financial assets are initially recognized at fair value with changes in fair value recorded through profit or loss.

Available-for-sale

AFS financial assets are non-derivatives that are either designated as available-for-sale or not classified in any of the other financial asset categories and are recognized at fair value and subsequently carried at fair value. Changes in the fair value of AFS financial assets other than impairment losses are recognized as other comprehensive loss and classified as a component of equity.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are classified as current assets or non-current assets based on their maturity date. Loans and receivables are initially recognized at fair value and subsequently carried at amortized cost less any impairment losses.

Impairment of financial assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

3. Summary of Significant Accounting Policies, continued

(j) Financial Instruments, continued

Financial liabilities

The Company classifies its financial liabilities in the following categories: other financial liabilities and derivative financial liabilities.

Other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs incurred, and are subsequently stated at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in profit or loss over the period to maturity using the effective interest method. Other financial liabilities are classified as current or non-current based on their maturity date.

The Company has no derivative financial liabilities.

(k) Equipment

Equipment is measured at cost less accumulated depreciation and impairment losses. Cost comprises expenditures that are directly attributable to the acquisition of the asset. Gains and losses on disposal of an item of equipment are determined by comparing the proceeds from disposal with the carrying amount of the equipment, and recognized in profit or loss.

Depreciation is calculated over the estimated useful life of the assets using the declining-balance method at an annual rate of 30%.

(l) Mining Exploration Tax Credit

The federal and provincial taxation authorities provide companies with tax incentives for undertaking mineral exploration programs in certain areas. The Company accounts for these credits as a reduction of exploration and evaluation expenditures in the period that the credits are received. These credits are subject to review by the relevant authorities and by their nature are subject to measurement uncertainty. Adjustments, if any, resulting from such a review are recorded in the period that the tax filings are amended.

(m) Accounting Standards Issued and Effective for the Current Fiscal Year

The adoption of the following standards has not had a significant impact on the Company's financial position or performance.

- Offsetting Financial Assets and Financial Liabilities (Amendments to IAS 32)
- Recoverable Amount Disclosures for Non-Financial Assets (Amendments to IAS 36)
- Annual Improvements 2010-2012 Cycle

3. Summary of Significant Accounting Policies, continued

(n) Accounting Standards Issued but not yet Effective

The following accounting standards are issued, but not yet effective. The Company has not early-adopted these revised standards and expects no significant effect on the Company's financial statements when adopted.

IFRS 9 *Financial Instruments*

IFRS 9 includes requirements for recognition, measurement, and derecognition of financial instruments and hedge accounting. The IASB is adding to the standard as it completes the various phases of its comprehensive project on financial instruments, and so it will eventually form a complete replacement for IAS 39 *Financial Instruments: Recognition and Measurement*.

IFRS 9 was originally issued in November 2009, reissued in October 2010, and then amended in November 2013. The current version of IFRS 9 is applicable to annual periods beginning on or after January 1, 2018.

Accounting for Acquisitions of Interests in Joint Operations (Amendments to IFRS 11)

This standard amends IFRS 11 *Joint Arrangements* to require an acquirer of an interest in a joint operation in which the activity constitutes a business (as defined in IFRS 3 *Business Combinations*) to apply all of the business combinations accounting principles in IFRS 3 and other IFRS, except for those principles that conflict with the guidance in IFRS 11 and to disclose the information required by IFRS 3 and other IFRS for business combinations. The amended IFRS 11 is applicable to annual periods beginning on or after July 1, 2016.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)

This standard amends IFRS 10 *Consolidated Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures* (2011) to clarify the treatment of the sale or contribution of assets from an investor to its associate or joint venture and requires full recognition in the investor's financial statements of gains and losses arising on the sale or contribution of assets that constitute a business (as defined in IFRS 3) and requires the partial recognition of gains and losses where the assets do not constitute a business.

The amended IFRS 10 and IAS 28 are applicable to annual periods beginning on or after July 1, 2016.

4. Financial Instruments

(a) Categories of Financial Instruments

The Company's financial instruments include cash and cash equivalents, reclamation bond, and accounts payable and accrued liabilities.

The Company has classified its financial instruments into the following categories:

Financial Instrument	Category	Carrying Value
Cash and cash equivalents	FVTPL	Fair Value
Reclamation bonds	Loans and Receivables	Amortized Cost
Accounts payable and accrued liabilities	Other Financial Liabilities	Amortized Cost

(b) Fair Value

The carrying values of accounts payable and accrued liabilities approximate their fair values due to the short period to maturity. The reclamation bond is non-interest-bearing, has no maturity date and its carrying value approximates fair value.

(c) Financial Risk Management

The Company's risk exposure and the impact on its financial instruments are summarized as follows:

(i) Liquidity Risk

Liquidity risk is the risk that the Company will be unable to meet financial obligations as they fall due. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due by forecasting cash flows for operations and anticipated investing and financing activities and through management of its capital structure. The Company's financial liabilities of $96,522 have contractual maturities of less than 90 days (2014 - $22,753).

As at February 28, 2015, the Company's unrestricted cash balance of $117,551 would not be sufficient to meet the cash requirements for the Company's administrative overhead, maintaining its mineral interests and continuing with its exploration program in the following twelve months.

Expressed in Canadian dollars

4. Financial Instruments, continued

(c) Financial Risk Management, continued

(ii) Currency Risk

The Company is exposed to currency risk to the extent expenditures incurred or funds received and balances maintained by the Company are denominated in currencies other than the Canadian dollar. The Company does not use any hedges or other derivatives to mitigate the risk against foreign exchange fluctuations.

As at February 28, 2015, the Company had no amounts receivable or payable in foreign currencies, and accordingly, is not exposed to currency risk.

(iii) Interest Rate Risk

In respect of the Company's financial assets, interest rate risk mainly arises from the interest rate impact on cash and cash equivalents and reclamation bond. As at February 28, 2015, the Company's exposure is immaterial.

(iv) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge its contractual obligations. The Company is exposed to credit risk mainly in respect to managing its cash position, which is held with Canadian financial institutions. The Company mitigates credit risk by risk management policies that require cash deposits or short-term investments be invested with Canadian chartered banks rated BBB or better, or commercial paper issuers rated R1/A2/P2 or higher. All investments must be less than one year in duration.

(v) Other Price Risk

Other price risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to other price risk.

5. Mineral Properties

	2015	2014
Acquisition costs	$ 513,682	$ 513,682
Deferred expenditures (Schedule)	11,177,973	11,174,459

Lustdust Claims

i) On July 15, 1989, the Company acquired a 100% interest in certain mineral claims located in the Omineca Mining Division, British Columbia, for $170,000 cash. The vendor retains a 3% net smelter return royalty ("NSR").

ii) On February 21, 1992, the Company acquired a 100% interest in certain mineral claims located in the Omineca Mining Division for $100,000 cash and 20,000 shares of the Company at a fair value of $6 each (previously subject to a 5% net profit interest to a maximum of $100,000 and a 2% NSR). In July 2003, the Company acquired the retained "5% net profit interest and the 2% NSR" for $150,000 cash.

iii) The Company's Lustdust Property is currently comprised of 20 "cell" claims, 100% owned by the Company. Ownership is currently secured through 2021 and/or 2022. There is no requirement for NSR or royalties on any of these claims.

iv) During the year ended February 28, 2015, the Company considered prevalent market conditions and ability to raise sufficient financing to be indicators of impairment, and as a result, recorded an impairment provision against capitalized costs related to these claims totaling $11,691,654.

Schedule		2015		2014

8. Share Capital

(a) Authorized

The authorized capital of the Company is an unlimited number of common shares without par value.

(b) Share Issuances

There were no share issuances during the year ended February 28, 2015.

On January 13, 2014, the Company announced the completion of a flow-through private placement of 795,000 flow-through units at $0.06 per unit for gross proceeds of $47,700. Each flow-through unit consists of one flow-through common share and one share purchase warrant. Each warrant will entitle the holder to purchase one additional non-flow-through common share at a price of $0.06 per share for a period of 24 months. From the total proceeds, $7,950 was allocated as flow-through share premium. The Company incurred $3,079 as share issue costs for the placement.

8. Share Capital, continued

(b) Share Issuances, continued

During the year ended February 28, 2015, management determined the flow-through financing completed during the year ended February 28, 2014 would be re-designated as non-flow-through units, instead of flow-through units as originally stated. This has been approved by the holders of the units and is subject to regulatory approval.

(c) Share Purchase Warrants

Warrant transactions for the respective years are summarized as follows:

	Number of warrants	Exercise price
Balance, February 28, 2013	-	$0.00
Warrants issued, expiry January 13, 2016	795,000	$0.06
Balance, February 28, 2014 and 2015	**795,000**	**$0.06**

(d) Stock Options

The Company has established a fixed share purchase option plan whereby the Board of Directors may, from time to time, grant options to directors, officers, consultants or service providers to the Company. The maximum aggregate number of plan shares that may be reserved for issuance under the plan at any point in time is 944,734 shares, less any common shares reserved for issuance under share options granted under share compensation arrangements other than the plan, unless the plan is amended pursuant to the requirements of the TSX Venture Exchange policies at the award date. Options granted under the plan may have a maximum term of ten years. The exercise price of an option may not be less than the closing price on the TSX Venture Exchange on the last trading day preceding the grant.

(e) Share-based Payments

During the year ended February 28, 2015, the Company did not grant any stock options. During the year ended February 28, 2015, the Company expensed $23,425 for stock options vested from the 2014 option grant.

During the year ended February 28, 2014, the Company granted 625,000 stock options to directors, officers, employees and consultants of the Company and expensed $9,247 for stock options vested up to February 28, 2014. The fair value of stock options granted of $0.06 per option was estimated using the Black-Scholes option pricing model with the following weighted average assumptions: dividend yield nil; expected volatility 172%; risk-free interest rate 1.63%; and weighted average life of five years.

9. Related Party Transactions

During the year ended February 28, 2015, the Company incurred $6,000 (2014 - $3,500) for office rental expense to a director and an officer of the Company.

During the year ended February 28, 2015, the Company paid $Nil (2014 - $2,500) for office rental expense to an officer of the Company (retired in June 2013).

As of February 28, 2015, accounts payable included $5,000 (2014 - $5,000) payable to directors for directors' fees, $52,504 (2014 - $Nil) to a director and an officer of the Company for management and administration services and $18,692 (2014 - $Nil) to a director and officer for financial and operating services. The amounts are without interest or stated terms of repayment.

The key management personnel of the Company are the directors and officers of the Company. The Company has no long-term employee benefits or post-employment benefits. Compensation awarded to key management during the years ended February 28, 2015 and 2014 are as follows:

		2015		2014
Short-term employee benefits	$	86,004	$	97,004
Share-based payments		23,425		9,247
Total	$	109,429	$	106,251

Expressed in Canadian dollars

10. Capital Management

The Company includes equity, comprising issued common shares, share-based payment reserve and deficit in the definition of capital.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The property in which the Company currently has an interest is in the exploration stage, and as such, the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the year ended February 28, 2015. The Company is not subject to externally-imposed capital requirements.

11. Segmented Information

The Company operates in one segment primarily directed towards the acquisition, exploration and ultimate development of gold and other precious metals with regard to mineral properties held in British Columbia, Canada.

12. Income Taxes

A reconciliation of the income tax expense computed at statutory rates to the reported loss before taxes is as follows:

		2015		2014
Income tax benefit at statutory rate of 26.0%	$	(3,085,648)	$	(41,885)
